

# Storyboard

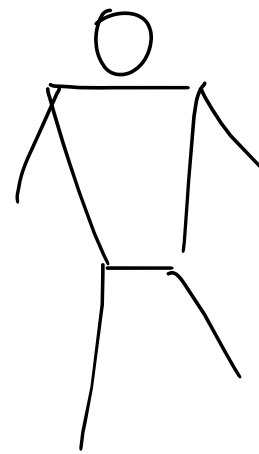

Showcase of use of SaveNTravel through out the journey of 4 friends

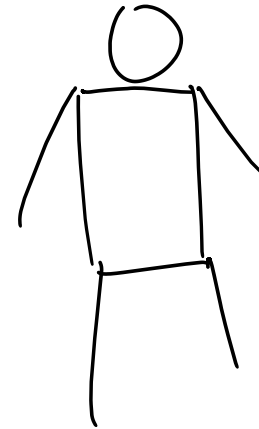

Rebecca

Alessandro

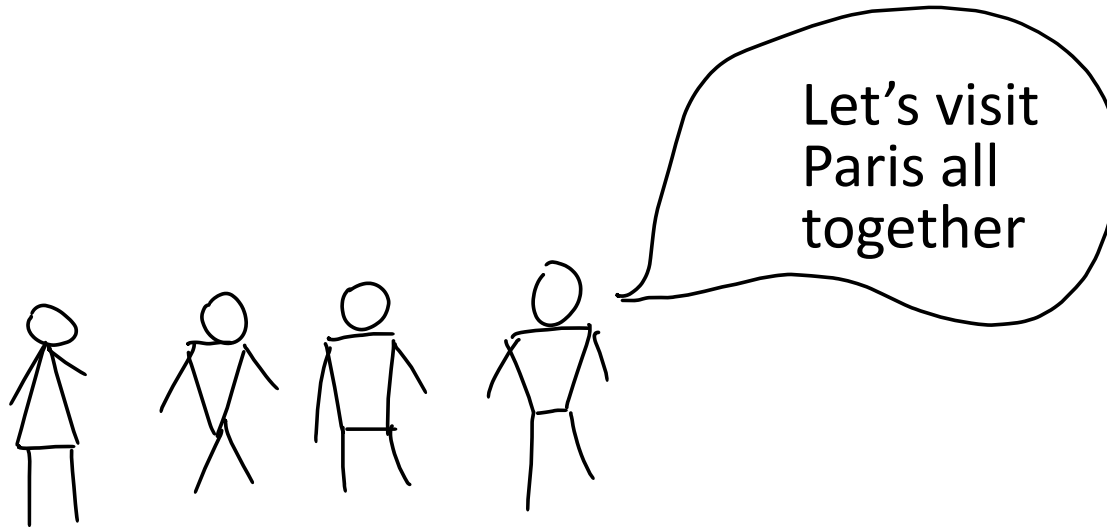

Gianluca

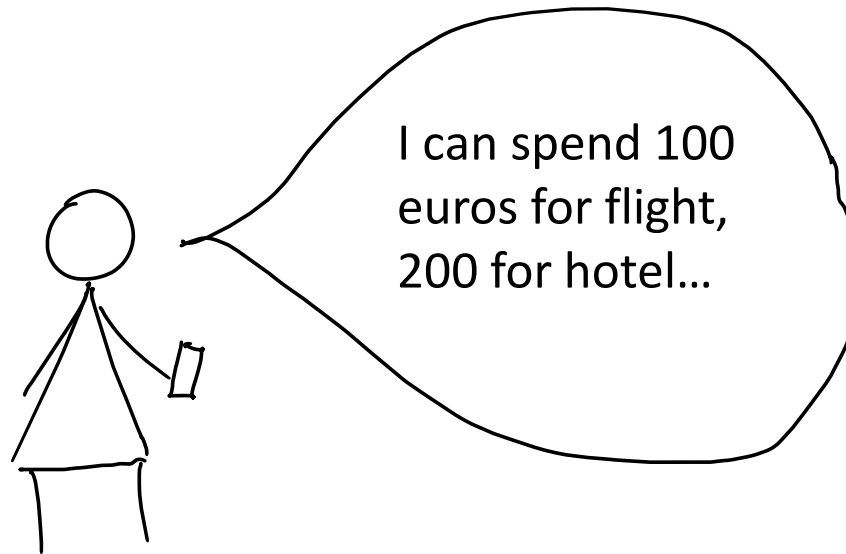

Arsen

4 friends decide to go on a trip

# Task 1. Budgeting (Individual)

- Rebecca uses SaveNTravel Individual Budget management feature to set amount of money she can spend on different categories of expenses

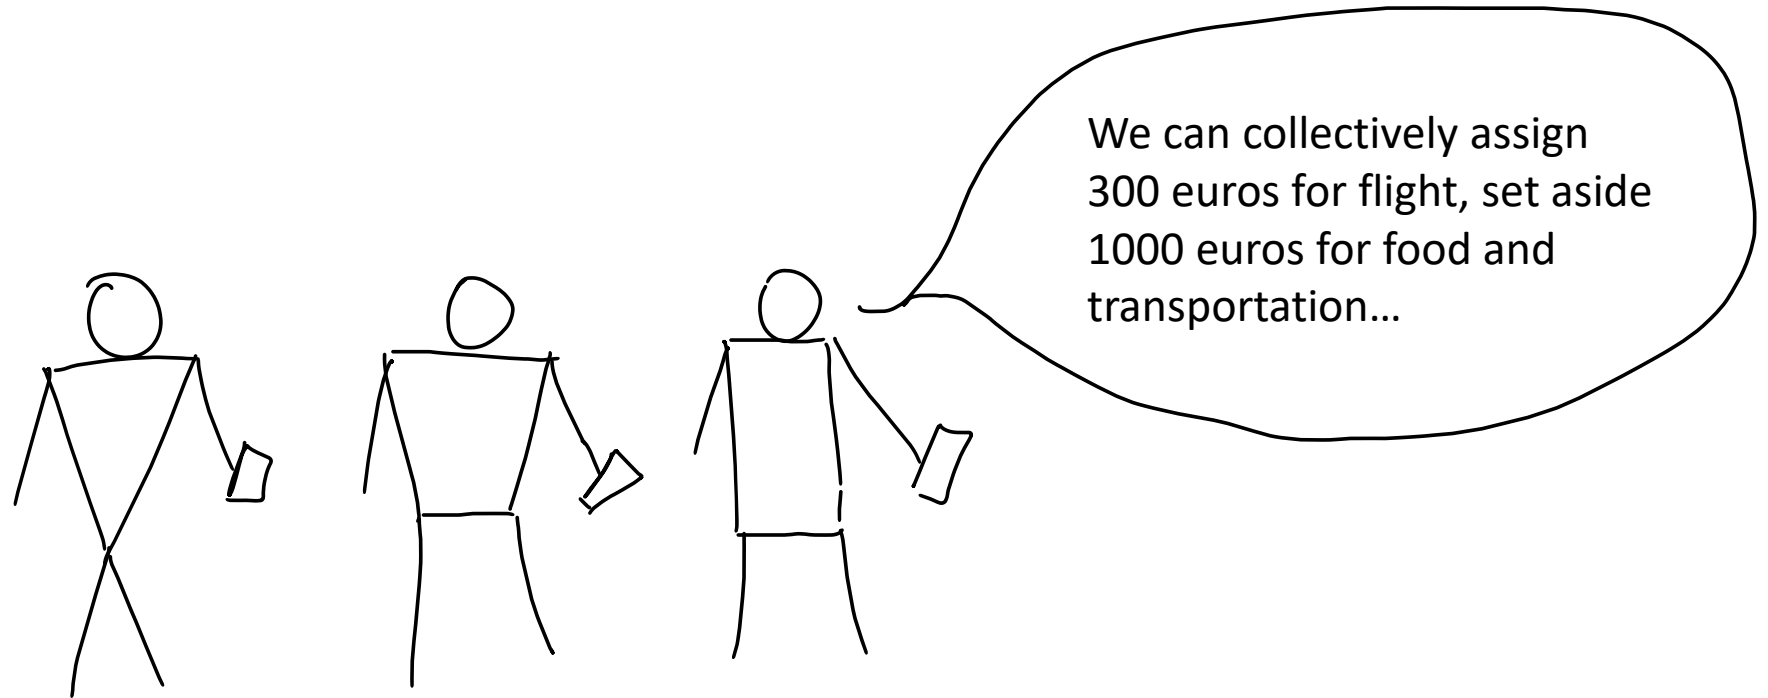

## Task 2. Budgeting (Group)

- While Alessandro, Gianluca and Arsen decides that each of them will bring 1000 euros each and will do budgeting together

## Task 2. Budgeting (Group) (cont.)

- So they create a trip group in SaveNTravel and then set their budgets as a group

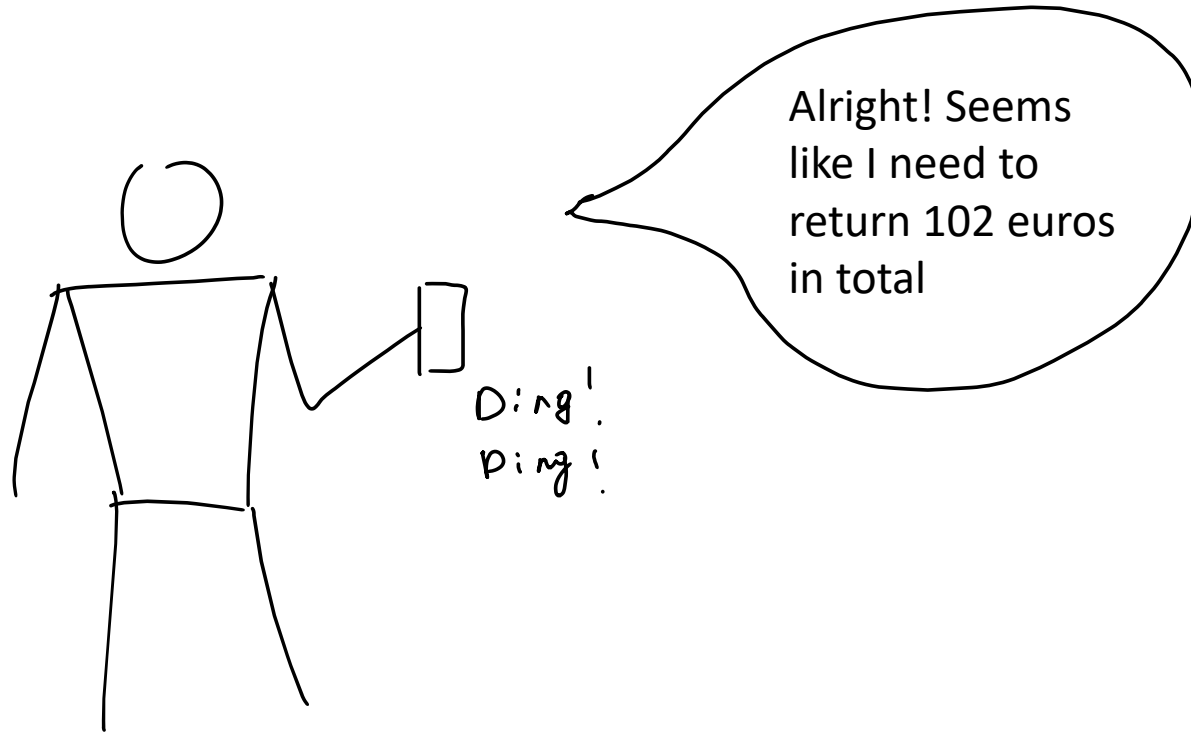

# It's time to go to Paris

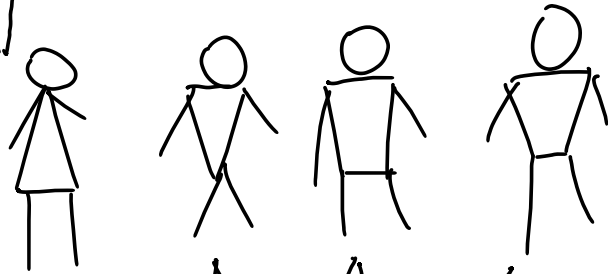

# Task 3. Money Exchange

- Later Gianluca will check how much he owes Alessandro in SaveNTravel, and he can return the way he prefers

# During the trip 4 friends decide to try infamous French snails

Let's try some snails. And what if we just split the money equally regardless of who eats how much?

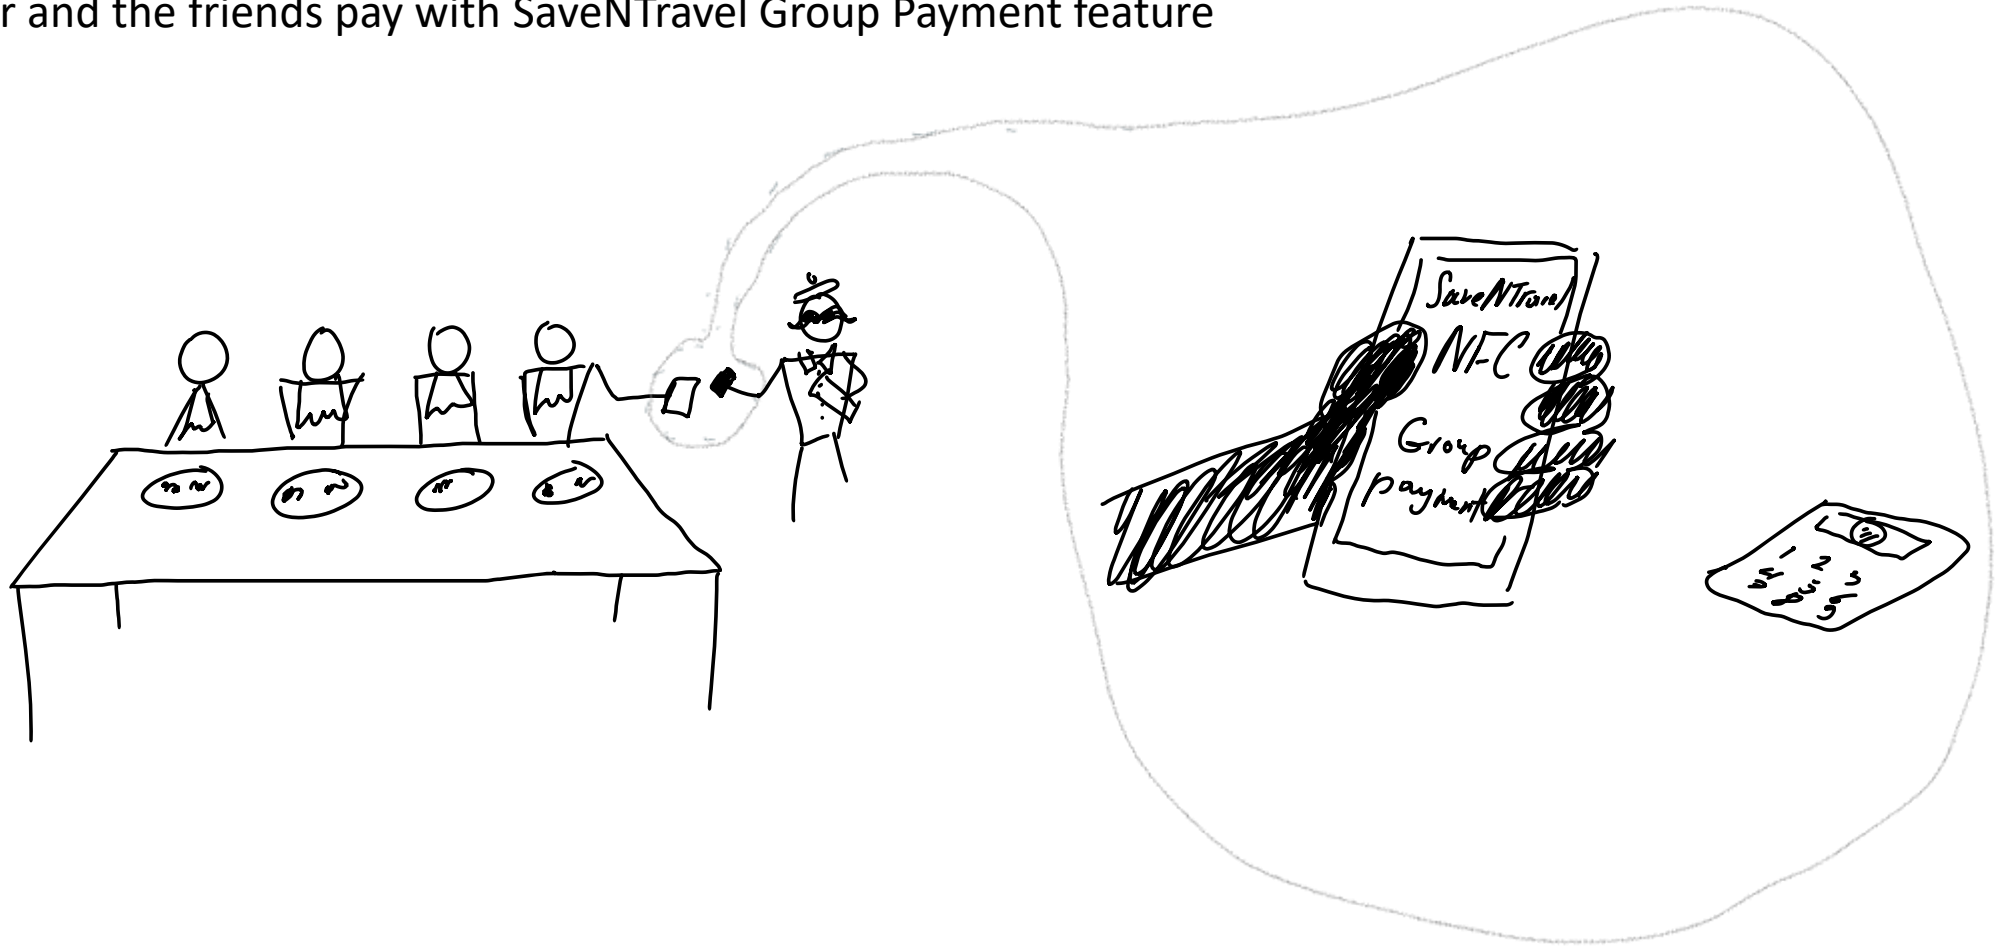

Agreed!!!

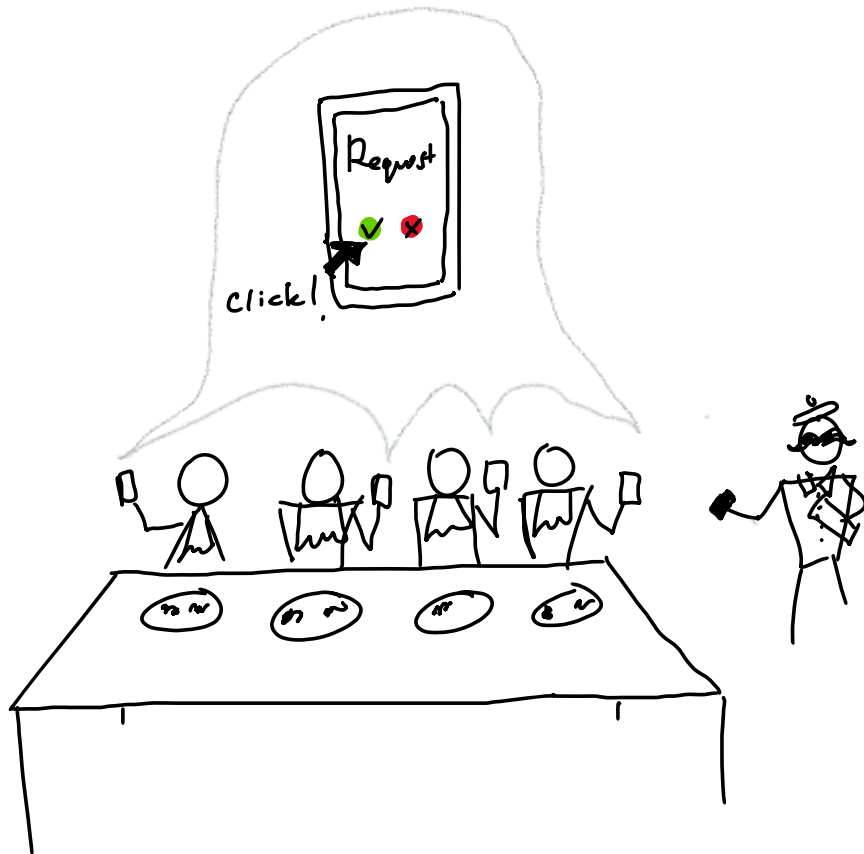

# Task 4. Automatic payment split

- Once they finish eating their deliquiate snails, the waiter arrives with NFC reader and the friends pay with SaveNTravel Group Payment feature

# Task 4. Automatic payment split (cont.)

- Then everyone receives a request to allow paying the part of the cost with their card.

- Once they have paid, the expenses will be subtracted from and logged into the joint (group) and/or individual budget

## Task 4. Automatic payment split (cont.)

- It's done!
